Protect Yourself Against the Sun's Harmful Rays

The best way to prevent sunburn in children over 6 months old is to follow these tips from the American Academy of Dermatology:

- Generously apply a broad-spectrum water-resistant sunscreen with an SPF (Sun Protection Factor) of at least 30 to all exposed skin. Re-apply about every 2 hours and after swimming or sweating.
- Wear protective clothing such as a long-sleeved shirt, pants, a wide-brimmed hat, and sunglasses, whenever possible.
- Seek shade when appropriate. Remember that the sun's rays are strongest between 10 a.m. and 4 p.m.
- Use extra caution near water, snow, and sand. They reflect the damaging rays of the sun. This can increase your chances of sunburn.
- Protect your lips with lip balm with at least SPF 15.
- Remember that many over-the-counter and prescription medicines increase the skin's sensitivity to UV rays. So it's possible to develop a severe sunburn in just minutes when taking certain medicines. Read medicine labels carefully and use extra sunscreen as needed.
