There's a place at the virtual table for you!

Health and Wellness Tip for September

September is National Preparedness Month. Are you prepared to keep yourself and your loved ones safe if a disaster occurs? The best way to ensure that everyone stays healthy and safe during a disaster is to be prepared. Below are some tips:

- **Prepare an emergency supply kit.** Include enough water, food and medications for at least three days per person, as well as a first-aid kit, flashlight, batteries, cell phone charger and other necessities you and your family might need.
- **Create an emergency plan.** Note your home's exits, areas of refuge and where you should meet your family if separated. Review and practice the plan regularly and make sure children know your phone number and address.
- **Make sure you have access to important documents.** Protect and store documents, such as financial and legal documents and insurance information, in a fireproof safe, on a password-protected thumb drive or on an online "cloud" server.
- **Learn a lifesaving skill.** Whether it is first aid, CPR or "**Stop the Bleed**" bystander training, these skills could help save someone's life.
- **Install detectors in your home.** Smoke alarms should be placed on every level of your home and tested monthly. Also consider placing carbon monoxide detectors and natural gas detectors throughout your house to alert you of any emergencies
